

# SAP BUSINESS ONE MAKES LIGHT WORK DELIVERING LOGISTICAL EXCELLENCE

The Makoya Group is a niche bulk material enterprise focusing on road-to-rail migration servicing the energy, transportation, agriculture, manufacturing, and mining sectors. Based in South Africa, the organisation delivers end-to-end supply chain support and management.

Through the support of their partners including Eskom and Transnet, they have become the preferred service provider for rail, road, sidings, and terminal solutions for bulk commodities and cargo in Southern Africa.

They have grown to become a diversified service provider with the goal of fulfilling their Four Pillars approach to business including, Supply Chain Management, Properties and Equipment, Technology and Technical Services, and Advisory, Mergers, and Acquisitions.

Together with G3G, we replaced their outdated system with SAP Business One to maintain a high level of quality, without having to shift costs.

 **Industry**  
Logistics

 **Solution**  
SAP Business One

## OBJECTIVES

- There were several requirements that were no longer being met by the previous software solution.
- A more robust ERP was required that could grow with the business.

## SOLUTION

G3G provided a great understanding of their industry and could implement SAP Business One seamlessly.

## OUTCOME

- Manual operations are fully automated, reducing inaccuracies and human error.
- Customisable reports are quicker and easier to produce, enabling management to analyse data rather than compile it.
- Real-time data which allows for making important business decisions faster.
- Able to fully track assets which save valuable time.
- Simplified operations and enable space to grow.
