

# INTERNATIONAL AEROSPACE AND DEFENCE

Headquartered in New York City, USA, this aviation company employs approximately 38,000 people worldwide and is a leading provider of a wide range of communication, electronic and sensor systems used on military, homeland security and commercial platforms. They are also a prime contractor in aerospace systems, security and detection systems, and pilot training.

Best known as a defence company, the corporation is stepping up its focus on the civil aviation market, spanning onboard avionics, airport security systems and pilot training. A simulator training center being built near Gatwick Airport will provide training for pilots on eight full-flight simulators, and an adjacent manufacturing hall will assemble up to 30 devices a year for its own training business and third-party customers.

Defence

Solution: SAP  
S/4HANA

## OPPORTUNITY

The project was defined as a best practice implementation for a single company with functionality to include Finance, Sales and Distribution, Materials Management, Inventory Management, Project Systems and Production Planning.

## SOLUTION

G3G was brought in to implement an on-premise **SAP S/4HANA** solution.

During the discovery phase, new locations and added functionality were included in the scope, including a fuller Warehouse Management solution and multiple methods for Integrated Business Planning and Costing.

## OUTCOME

G3G has also supported an upgrade to SAP S/4HANA to ensure, once live, all systems are as up-to-date as possible. This technical upgrade was completed in less than two months, including rigorous test processes to ensure any configuration and extensions still worked as expected.
