## BEYOND CORPORATE PURPOSE: Elephants, Rhinos & People ('ERP')

G3G became part of **groupelephant.com** in 2016.

Our Group operates under a hybrid business model in which we fund and run an in-house non-profit so that we go 'Beyond Corporate Purpose' in our day-to-day activities. Rather than implementing a traditional corporate social responsibility program and simply donating funds to charities, we operate a professionalised, institutional non-profit delivery capability.

The primary focus is the protection and conservation of Elephants and Rhinos in the wild, through an unusual strategy based on the economic upliftment of impoverished rural People in areas adjacent to the threatened species, or another definition of 'ERP', if you will.
